Jewellery inspired with history

Origo is a collection of jewellery inspired with history, tradition and cultural heritage of the region. *Origo*, derived from Latin, means genesis, origin, beginning, descent, source.

The Origo collection was inspired by objects found during excavation works in Truso settlement (the vicinity of today's village of Janów by Lake Drużno). Truso was a crafts settlement and a Viking port which functioned between the 8th and the 11th centuries. Currently, the objects are gathered in the Museum of Archaeology and History in Elbląg.

Studio TT has been creating jewellery based on characteristic motives and with the use of materials and pieces of art for several years now. Our realizations include, among other things: Prussian Babas, elements of historic ceramics from Kadyny, spatial forms from Elbląg, Viking ornaments from Truso settlement...

Origo is a collection on unique jewellery, inspired with tradition and history, produced in a local company by local artists and craftsmen. It was designed with the idea of promoting the region it comes from.
